

Exit Tickets

Was this session helpful?

Yes -36

No - it exceeded my expectations

No - I had no clue what is was about

What can we do to improve?

- Keep things the same
- I would suggest you use these forums as opportunity for community members to be involved in the ongoing strategic planning meetings
- Keep pitching
- Encourage each person to give their opinion
- Nothing
- Media coverage may inspire more participation. More eyes, more ideas
- Pictures of the school with water on the floor, the challenging roof, etc.
- Short video walk through of existing facility as warm up for the presentation would have helped those unfamiliar with the site
- Parking, bus flow, impact on residents across the street
- Saw notice in Sequim Gazette - social media might be used as well
- More clarity as to what is proposed and why it wasn't addressed prior to seeking funding
- Would have helped to show OPA area separately - in different color on graphic
- Talk about long term savings in money
- Talk about making the site ready to be used for another school
- Great presentation - thank you
- Nothing - lots of good details
- Very nicely presented by Superintendent Neal. Discuss at onset Vanir - what is it?
- Possibly use a larger projector of the options
- How can we/you get more general population (voters) to attend these sessions
- Keep doing this!
- Think and talk more about OPA in this process
- Explain the process and in doing so explain how concerns of mold & asbestos would be taken care of
- An agenda to answer covering all issues
- Visuals in an easier viewing space
- I like option 2 to keep all the kids in one area and not spend on relocating or renting someplace else
- What happens after this? Another bond, levy?

Anything else you would like us to know?

- I like option 1
- Just do it correct the first time
- I prefer option 3
- You have done your homework
- I heard about the meeting on the radio
- The increase of the flexibility that you found out on the land owned by the district is important
- The mold in the community school is an important factor in re-using this space
- Very well done
- Wonderfully done
- Make the kitchen big enough for scratch cooking - make sure you think about the future
- Appreciate you including long range vision how this relates to future construction
- Will you publicize the outcome of meeting with OPA folks - to provide specifics on what they will need in their space
- Nice job Gary - your enthusiasm was inspiring
- Thank you for sharing your 5 year goals and new ideas
- Thank you for your long term vision and putting our students
- Please advocate for what is best vs. cost
- Just concerned about fir street traffic, parking & safety
- Good presentation very informative
- Option 3 seems to make the most sense in many ways, current needs, future flexibility, cost and short timeline
- I like option 2 but if this is not affordable I think we should stick with the baseline
- Address transportation problems, parking on city streets, handouts were very helpful
- Thanks for thinking outside the Horace Man box
- All info on current and long term is excellent
- Keep the communication coming
- I love the vision! Just need a very strategic marketing strategy
- Great - thank you.
- I like option 3 - gable roof
- The chars, handouts & graphs were extremely helpful. Well laid out and very informative.
- Will surplus budget funds be used for non-matching fund projects?
- Maybe tie in how the changes mesh with vision/mission: Engage*Empower*Thrive
- The information was well presented
- I appreciate review of the background events - even though I have lived here for 10 years, it refreshed and clarified the context of our current situation.
- Glad for your continued encouragement of community member's involvement?
- Option 3 give the best solution. It allows for growth & districts vision for this growth & organization. Kids first!
